## TOOLS NEEDED

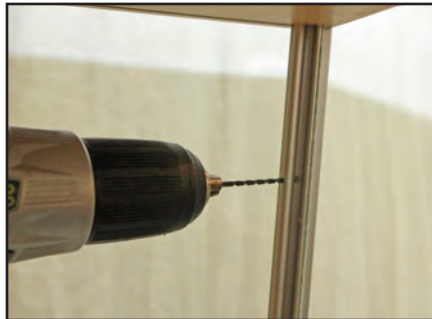

- Electric Drill or Cordless.
- Phillips Screw Driver
- 1/8" Drill Bit
- 1/2" Drill Bit

## Light Bar Installation Instructions

**Step 1.**  
Remove back door panels,  
glass shelves and top glass  
then lay showcase on its side.

**Step 2.**  
Drill hole at each ends  
for light bar clips.  
(Drill 3rd hole in center of rail  
for 6' showcase)

**Step 3.**  
Screw in light bar clips.  
(3 clips for 6' Showcase)

**Step 4.**  
Attach lightbar  
to clips.

**Step 5.**  
Align aluminum pole to  
end of light bar and mark  
hole placement on base.

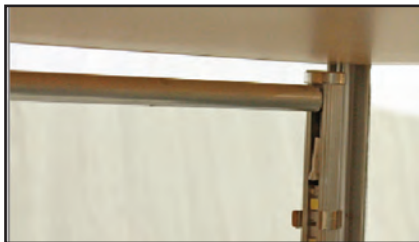

**Step 6.**  
Drill 1/2" hole.

**Step 7.**  
Feed power cord through  
aluminum pole.

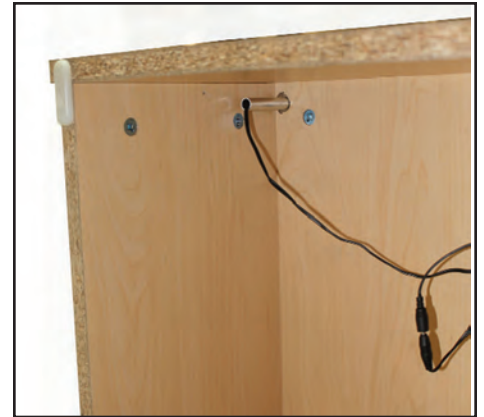

**Step 8.**  
Pull power cord all the  
way through pole and  
add set ring onto pole.

**Step 9.**  
Place pole through hole  
and align other end of  
pole with light bar.

**Step 10.**  
Tighten set screw.

**Step 11.**  
From bottom  
of showcase, connect  
power cord to power supply.

**Step 15.**  
Plug in and turn on  
LED lightbar.
